

► **WATERLESS VAPOR ODOR NEUTRALIZERS**

Hinsilblon has developed the only true “vapor phase” odor neutralization system for application without water. The combination of our direct vaporization delivery equipment and the essential oil product provides a complete vapor phase odor neutralization solution.

**Why Vapor is safe...**

Vapor is a safe, concentrated blend of pure biodegradable organic essential oils and trace elements. There are no hazardous air pollutants as promulgated under the Clean Air Act 40 CFR Part 63, sub part C. It contains no water, surfactants, petroleum distillates, alkalies or chlorinated solvents, and is nontoxic and unhazardous.

**USDA Approved**

This product is acceptable for use in inedible processing areas, nonprocessing areas and/or exterior areas of official establishments operating under the Federal meat, poultry, shell egg grading and egg products inspection programs provided that it is not used to mask odors resulting from insanitary conditions and that any characteristic odor or fragrance does not penetrate into an edible product area.

**Vapor Products...**

**Evane|Scent** is a safe blend of biodegradable essential oils and trace elements specifically formulated to neutralize odors in solid waste, industrial and municipal facilities. The combined fragrances of Evane|Scent’s individual components are detectable before its interaction with odor compounds and as a result Evane|Scent is the most aromatic of Hinsilblon’s vapor products.

**Eco|Scent** is a safe blend of biodegradable essential oils and trace elements specifically formulated to neutralize odors in solid waste, industrial and municipal facilities. The combined fragrances of Eco|Scent’s individual components are detectable before its interaction with odor compounds and as a result Eco|Scent is Hinsilblon’s moderately aromatic vapor product.

**Clear|Scent** is a safe blend of biodegradable essential oils and trace elements specifically formulated to neutralize odors in solid waste, industrial and municipal facilities. The combined fragrances of Clear|Scent’s individual components are detectable before its interaction with odor compounds and as a result Clear|Scent is the least aromatic of Hinsilblon’s vapor products.

**Orange|Scent** is a safe blend of biodegradable citrus oils and trace elements specifically formulated to neutralize odors in solid waste, industrial and municipal facilities. The combined fragrances of the citrus oils results in the most aromatic of Hinsilblon’s vapor products.
